

To the Members of the California State Senate:

I am returning Senate Bill 1152 without my signature.

This bill proposes an ammunition registration process that has already been considered and rejected by the federal government when they repealed a substantially similar law citing it was simply unworkable and offered no public safety benefit. In addition, no other state collects information on ammunition sales or purchasers. Forensic testing of ammunition used in a crime is the most effective way of tracing criminal activity.

For these reasons I am returning this bill without my signature.

Sincerely,

Arnold Schwarzenegger
